

BRANDON TSUEDA

Network Engineer | Cybersecurity | Infrastructure Operations

Louisville, KY | (502) 676-8984 | brandon.tsueda@live.com | linkedin.com/in/brandontsueda | brandontsueda.com | github.com/BrandonTsueda

PROFESSIONAL SUMMARY

Network engineer with enterprise NOC experience, cybersecurity training, and hands-on infrastructure ownership. Experienced in monitoring large-scale environments, triaging alerts, documenting incident context, supporting DNS and firewall workflows, and troubleshooting across network, systems, and application layers. Holds a Master of Science in Business Intelligence, Bachelor of Science in Cybersecurity, and Associate of Science in Information Technology. Strong foundation across Linux/Windows systems, automation, monitoring, dashboards, secure access, and self-hosted infrastructure.

CORE SKILLS

Network Operations	DNS, DHCP, TCP/IP, VPNs, SSL/TLS, IPsec, SolarWinds, Dynatrace, ServiceNow, alert triage
Security	Nessus, Nmap, Wireshark, Metasploit, Burp Suite, OpenSSL, CyberChef, OWASP, MITRE ATT&CK
Systems	Linux, Windows Server, Windows 10/11, Azure, VMware, ESXi, KVM, Proxmox, Docker, Nginx
Automation	Python, PowerShell, Bash, Ansible, GitHub, API workflows, scripting, technical documentation
Monitoring	Service health, incident intake, escalation context, infrastructure visibility, operational reporting
Analytics	Power BI, Advanced Excel, KPI reporting, dashboards, trend analysis, dimensional modeling

PROFESSIONAL EXPERIENCE

Network Operations Center Engineer | Humana | Louisville, KY | April 2024 - Present

- Monitor enterprise network activity, server health, and application signals across large-scale environments supporting 50,000+ servers and services.
- Investigate alerts and outage tickets using SolarWinds, Dynatrace, ServiceNow, and related operational tools.
- Support DNS and firewall change workflows while maintaining clear documentation, escalation context, and service-impact awareness.
- Apply structured troubleshooting across connectivity, routing, firewall, storage, services, containers/VMs, and application layers.

Global Inside Partner Development Manager | Microsoft | Remote | Jan 2022 - Dec 2023

- Supported global partner alliances with SAP, Bentley, and ESRI across cloud, SaaS, and platform solution motions.
- Managed SaaS/PaaS pipeline reporting exceeding \$700M annually and produced reporting for executive stakeholders.
- Strengthened ability to connect technical solution value with customer needs, business outcomes, and stakeholder communication.

SELECTED PROJECTS

Bratsu SecureOps

- Developing an AI-assisted managed IT and cybersecurity platform for small-business asset visibility, findings, guided remediation, and auditable workflows.
- Designed around secure deployment, maintainable automation, and practical operational evidence rather than opaque AI actions.

Proxmox Homelab Infrastructure

- Maintain a production-style Proxmox environment with VMs, LXCs, Pi-hole DNS, Tailscale, Nginx reverse proxying, monitoring, backups, and self-hosted AI tooling.
- Use the lab to practice secure configuration, incident-style troubleshooting, service recovery, automation, and infrastructure documentation.

Bratsu Agent, Ansible Console, and Observability

- Operate private agent infrastructure spanning a Proxmox control plane and MSI AI workstation with persistent project context and controlled remote access.
- Built a Raspberry Pi Ansible control surface and Prometheus/Grafana fleet monitoring for repeatable maintenance and evidence-based recovery.

EDUCATION

Master of Science in Business Intelligence | Full Sail University
Bachelor of Science in Cybersecurity | Full Sail University
Associate of Science in Information Technology | Full Sail University

TARGET ROLES

Network Engineer, NOC Engineer, Systems Administrator, Cybersecurity Analyst, Security Operations Analyst, Infrastructure Support Engineer, Business Intelligence Analyst
